SUMMARY

Computer Science undergraduate specializing in AI/ML, building multi-agent LLM systems, evaluation pipelines, and real-time computer vision apps using PyTorch, Hugging Face, LangGraph, and FastAPI.

EDUCATION

- B.Tech. in Computer Science & Engineering, RIMT University, Mandi Gobindgarh, Punjab, India | 2023-2027 | CGPA: 8.76/10 (through Sem 6)
- Class XII (CBSE) – DAV Public School | 2022-2023

PROJECTS

- **Multi-Agent Study Orchestrator** | Python, LangGraph, FastMCP, FastAPI
 - Built a LangGraph multi-agent system with a supervisor agent and 3 specialized sub-agents for notes, explanation, and quizzes, using custom MCP tools and a custom RAG pipeline over user notes.
 - Built a FastAPI backend with async agent execution, checkpoint-based branching, and live workflow visualization.
- **Automated AI Response Judge** | Python, PyTorch, Hugging Face
 - Built a dual-pipeline evaluator pairing a fine-tuned DeBERTa style judge (human preference) with a locally served Qwen 3.5-2B factual judge.
 - Fine-tuned DeBERTa-v3 as a preference judge: 67.21% on Anthropic HH-RLHF (50% chance) and 56.96% on LMSYS Chatbot Arena (33.33% chance).
- **Real-Time Face Recognition** | Python, Django, OpenCV, NumPy
 - Built a Django app for real-time multi-face recognition (YuNet detection, SFace embeddings) matching live faces to user-enrolled identities via local embeddings.

TECHNICAL SKILLS

- **Languages:** Python, C++, C#, SQL
- **AI/ML:** PyTorch, Hugging Face, Scikit-learn, LangChain, LangGraph, RAG, LoRA, MCP
- **Backend/Data:** FastAPI, Django, Pandas, NumPy, Matplotlib
- **Tools:** Git, GitHub, Jupyter, Visual Studio

CERTIFICATIONS

- Machine Learning & Data Science (GeeksforGeeks)
- Deep Learning for NLP (Swayam)
- GitHub Certified: Agentic AI Developer (GitHub and Microsoft)

ACHIEVEMENTS

- 1st place in three college coding competitions (Think2Code, Error 404 Solved (debugging), CodeQuest) (2026).
- Solved 75+ problems on LeetCode.
