SUMMARY

Computer Science undergraduate specializing in AI/ML, with hands-on experience building multi-agent LLM systems, model evaluation pipelines, and real-time computer vision applications using PyTorch, Hugging Face, LangGraph, and FastAPI.

EDUCATION

- B.Tech. in Computer Science & Engineering
RIMT University, Mandi Gobindgarh, Punjab, India | 2023-2027
- Class XII | 2022-2023
- Class X | 2020-2021

PROJECTS

- **Multi-Agent Study Orchestrator** | Python, LangGraph, FastMCP, FastAPI
 - Architected a LangGraph multi-agent system for study-note generation, concept explanation, and interactive quizzes.
 - Built a FastAPI backend with MCP tools, checkpoint-based branching, asynchronous agent execution, and real-time workflow tracking.
 - Added live workflow visualization for monitoring multi-agent execution.
- **Automated AI Response Judge** | Python, PyTorch, Hugging Face
 - Built a dual-pipeline AI evaluation system separating style analysis from factual correctness to reduce sycophancy bias.
 - Fine-tuned DeBERTa-v3 and integrated Qwen 3.5-2B into an API-based evaluation pipeline, achieving 67.21% accuracy on Anthropic HH-RLHF and 56.96% on LMSYS Chatbot Arena splits.
- **Real-Time Face Recognition** | Python, Django, OpenCV, NumPy
 - Built a Django app for secure multi-face real-time recognition using YuNet/SFace; optimized offline embeddings with NumPy/JSON for cloud-independent matching.

TECHNICAL SKILLS

- **Languages:** Python, C++, C#
- **AI/ML:** PyTorch, Hugging Face, Scikit-learn, LangChain, LangGraph, FastMCP
- **Backend/Data:** FastAPI, Django, Pandas, NumPy, Matplotlib
- **Tools:** Git, GitHub, Jupyter, Visual Studio

CERTIFICATIONS

- Machine Learning & Data Science (GeeksforGeeks)
- Deep Learning for NLP (Swayam)
- Generative AI and ChatGPT (GeeksforGeeks)

ACHIEVEMENTS

- 1st place in three college coding competitions (Think2Code, Error 404 Solved (debugging), CodeQuest) (2026).
- Solved 50+ problems on LeetCode.
